

## ENERGY EFFICIENCY POLICY

We use our energy efficiently and set targets to reduce our energy consumption in order to protect our world from potential dangers. For this purpose;

- We follow national and international standards, laws and regulations in order to fulfill both our responsibilities to nature and our legal liabilities, we voluntarily perform works to ensure that our energy consumption is reduced and/or our energy consumption performance is continuously improved and we monitor the results of our works.
- We set targets and we include energy efficiency to our training programs to ensure participation of our employees. • We care about collaborating with all our stakeholders in order to create common objectives and results regarding energy management. We try to maintain our interaction in order to achieve a collective awareness and level of conscious in these areas together with our guests, employees, visitors, and all our partners.
- We try to research and find, purchase and use suitable energy efficient products, equipment, tools and technology alternatives.
- We aim to document our Energy Management System, to make it available in all our departments, to update and review it when necessary, and to continuously improve it.
- We assess any potential emergency, such as energy risks or energy limitations and plan the actions that can be taken.
- We pay attention to separate our wastes effectively according to their sources, groups and hazard classes.
- We know that utilization of hazardous substances and chemicals only when they are needed and in the required amounts would reduce their negative impacts on the environment and the amount of wastes,
- We contribute to the preservation of nature by preferring “recycling” and “environment friendly” labels for the materials we purchase for our enterprise. We try to create opportunities for reuse,
- We try to use single use materials, such as paper, napkin, toilet paper and packages as much as required and leave less amount of waste to nature,
- We store the wastes properly and in separate areas according to their properties, we deliver them to licensed/authorized companies before exceeding legal storage duration limits and we keep their records,
- We try to save water, energy and all natural resources. We share such sensitivity of ours with our employees, guests and suppliers.
- We measure our performance in environment management, monitor such data with targets and try to improve our performance.
- We aim to train and increase the sensitivity of our employees regarding environment
